

Product info sheet:

glimtrex® Intensive-Care white

Product description

Care product suitable for the revitalizing of all white wood-surfaces.
Suitable for all surfaces that are treated with white oils or Hardwax-Oils.

Characteristics

- Surface will look visibly cleaner
- Reduces yellowing of white oiled surfaces
- Based on biologically degradable surfactants (in accordance with the Washing and Cleaning Agents Act) and the natural wax of the carnauba palm
- Easy to use

Instructions

- Remove loose dirt with a vacuum cleaner or fine broom
- Wash floor with glimtrex Floor-Care as per instructions
- Wipe the surface and allow to dry properly
- Very dirty or damaged floors should be cleaned using glimtrex Remover
- Allow surface to dry thoroughly
- Apply the glimtrex Intensive-Care white evenly on the whole floor by using a lint free cloth or fibre mop
- Ensure that the whole surface is covered well
- Where possible, finish in the direction of the grain

For large surfaces, it is recommended to divide the surface into sections. The desired gloss level is built up independently.

Do not wipe in already dry[ing] areas as there is a risk of streaking.

When damp, avoid draughts and the movement of dust. Older surfaces or parquet finishes may have issues with Intensive-Care adhering due to possible existing finishes/coatings. Therefore, always test a sample area if possible and assess whether the result meets your requirements.

Please always use glimtrex® Remover or glimtrex® Floor-Care before using glimtrex® Intensive-Care white.

Yield per liter

- Lighter cleaning up to 45m²
- Medium cleaning up to 30m²
- Heavy cleaning up to 15m²

Technical information

Available in 1 and 5 litre cans.

The shelf life is minimum 24 months in the closed original tin. Make sure to stir the tin thoroughly before using.

Please look at the current safety data sheets. You will find them at www.glimtrex.de/downloads.
