

Product info sheet:

# glimtrex<sup>®</sup> Wood-Opaque-Colour

## Product description

glimtrex<sup>®</sup> Wood-Opaque-Colour is an open pored and coating finish for exteriors. It has a high resistance against weathering and is suitable for the restoration of old, open- pored finished of weathered wood.

## Characteristics

- based of natural renewable raw materials
- DIN EN 71-3: Security of children's toys
- protects for turning blue or mould
- water resistant
- keeps the wood from greying
- high and long lasting weathering protection
- UV- Protection
- easy to apply

## Application instructions

- stir the product before using
- old colour and lacquer remains have to be removed
- for an open- pored coating clean the wood thoroughly
- processing temperature (including drying) should be higher than + 8 °C. The wood humidity shout not exceed 18% and the humidity should be below 60%.
- apply glimtrex<sup>®</sup> Wood-Opaque-Colour thin and evenly with a whitewash brush, a brush or a roller drying time is approximately 12-24 hours ( normal climate 23° and relative humidity of 50%)
- dust-dry after 6 hours
- you can apply a second coat after 12-24 hours (one coat should be enough for renewing)

## Yield

1 Litre for 25 m<sup>2</sup> per coat. Depending on the type of wood or the wooden surface (freshly sawn or planed wood). If the surface is ripped the yield might double.

## Technical information

Available in 0.75 litre and 2.5 litre tins.
